

SKILLS

JavaScript/TypeScript, Python, Node.js, Express.js, PostgreSQL, AWS (Cloudformation, Lambda, DynamoDB, S3, API Gateway), Angular, React, RxJS, Pandas, HTML5, CSS3, Git, Linux/UNIX, JIRA

EXPERIENCE

Hubio Technology

Full-Stack Software Developer - Full Time

Sept 2022 - Present

- Developed Node/Express.js API for insurance broker analytics dashboard in existing enterprise application; built frontend page to display all streams of data received from backend services in dynamic graphs and charts; resulted in a 50% increase in revenue across clients
- Designed and developed AWS Cloudformation ETL pipeline to archive client data for analytical purposes; leveraging AWS Lambda with Python, S3, RDS, and API Gateway cloud services
- Led frontend development of multi-tenant Angular application; utilized RxJS to handle asynchronous requests from multiple backend services while handling reactive UI state
- Worked in an AGILE team environment with sprint based project management system through JIRA

KMER Consulting

Full-Stack Web Developer - Contract (Full Time)

Apr 2022 - Sept 2022

- Developed a React application to inform prospective clients about technical consulting services; landing page resulted in 50% higher response rate from prospective clients
- Built and structured a NoSQL database utilizing MongoDB to manage client documents and information; including booking system for managing multiple client meetings
- Maintained and added features to existing code using Git version control

Glistco LTD.

Frontend Web Developer - Full-Time

Jan 2021 - Apr 2022

- Developed and maintained a Shopify ecommerce site with HTML, CSS, and JavaScript
- Improved website performance by optimizing images and videos; increasing load times by 80%
- Implemented a consistent UI design and ensured responsive layouts for various devices and screens

PROJECTS

Clothing E-Commerce Site

2022

JavaScript | Node.js | Express.js | React | PostgreSQL | Tailwind | Git

- Developed E-Commerce clothing store with React utilizing the Redux library to manage global state along with memory caching; utilizing Tailwind framework for a modern frontend look
- Developed a JavaScript/Node backend to aggregate shopping cart, category routing, and sign-in functionality utilizing PostgreSQL database for user and product data

EDUCATION

Web Development Bootcamp - Colt Steele

2021 - 2022

Complete React Developer - Zero to Mastery Academy

2022
